

Testimonials:

Please remember me to all the staff at the clinic - I shall never forget you all and the good treatment I received. Thanks again for all your help during our stay in Bulgaria and again to all the staff at your clinic. I know things might have turned out differently without the care and attention I received from you all. I am very grateful.

Сигурни сме, че лекувацния лекар обръща нужното внимание на болната и успокоихме доколкото бе възможно дъщерята тук. За Вас в МБАЛ навярно е ежедневие, а за нас пореден повод да си спомним, че сме хора и трябва да помагаме.
